(54) FOOD PACKAGING BAG

(57)Abstract:

PROBLEM TO BE SOLVED: To display the quality, the design pattern, etc., by fixing a chuck to open/close an opening part of a bag so as not to be separated, and making use of a part to which the chuck is connected.

SOLUTION: A food packaging bag is provided with a net bag 1 in which a net material 4 is formed in a bag shape, a surface sheet 2 which is located at an opening part of the net bag 1 to adhere wires of the net bag to the surface, and a chuck 3 which is fixed to inner surfaces opposite to each other of the net bag 1 through the surface sheet 2 and connects the opening part of the net bag in an opening/closing manner. The chuck 3 comprises a projecting bar on one side, and a fitting groove to allow the projecting bar to be attached/detached thereto/therefrom on the other side. The projecting bar of the chuck 3 is attached to the fitting groove to cover the opening part of the net bag 1, and the projecting bar is detached to open the opening part of the net bag 1.

LEGAL STATUS

[Date of request for examination] 09.11.1998

[Date of sending the examiner's decision of rejection] 20.06.2000
